

TX6A™ U/UTP Copper Cable Standard Compliant Plus

SPECIFICATIONS

Category 6A/Class E_A cable shall be constructed of 23 AWG copper conductors with FEP insulation. The copper conductors shall be twisted in pairs. All four pairs shall be surrounded by a non-conductive AXT barrier tape and a flame retardant jacket. The AXT barrier tape shall minimize the cable diameter and suppress the effects of alien crosstalk. The small cable diameter shall maximize cable density such that existing pathways can be utilized when upgrading from Category 6 cabling.
